

**SERVICE LIST FOR  
GSP1600 USER TERMINAL (GLOBALSTAR/AMPS)  
AND GSP1620, GSP2800 UTs**

Service Name	Service Name
<p>Call restriction:</p> <ul style="list-style-type: none"> <li>- Outgoing calls restriction</li> <li>- Outgoing international calls restriction</li> <li>- Incoming calls restriction</li> <li>- outgoing calls constraint: only local calls (inside GlobalTel network only 7-digit dial-up)</li> </ul>	<p>This service allows implementing the temporary restriction on the definite call types.</p> <p>Note: outgoing calls restrictions and constraints leave possibility to make a call to the Customer Service Center number 611. Service activated by Service Center upon written subscriber request.</p>
<p>Separate subscriber phone number for AMPS cellular standard</p>	<p>This service allows for owners of GSP1600 User Terminals of Qualcomm to program independent phone numbers of cellular AMPS mode Service Providers. Service is supported by AMPS operators in Russian Federation and in other countries.</p>
<p>UT position determination</p>	<p>Service offers determination of the subscriber position (geographical coordinates, accuracy and time of measurements). Subscriber makes a call to non existing number and reads values on display or using at-commands via RS-232 interface.</p>
<p>Three-party call</p>	<p>The capability to make a simultaneous 3-party call (UT subscriber himself and two remote parties). Included in “Main Service Pack”</p>
<p>Call divert</p>	<p>This service enables subscribers to divert an established call to the predetermined number. Service activated by Service Center upon written subscriber request.</p>
<p>GlobalTel Phone Card</p>	<div style="display: flex; justify-content: space-around;">   </div> <p style="text-align: center;"><b>GlobalTel Phone Card</b> is intended to offer within GlobalTel service area an automatic long-distance and international calls through the GlobalTel system of prepaid services with the access code 771 (voice menu in Russian) and 7771 (voice menu in English). The connection can</p>

Service Name	Service Name
	<p>be established <b>from any portable or fixed Qualcomm user terminal registered in GlobalTel network</b>. The terminal can be in the voluntary or forced blocking mode. "GlobalTel" is issuing prepaid cards for the nominal values 10, 20 and 50 units.</p> <p>GlobalTel card looks like a plastic card, suitable to be held in a pocket. The card name and nominal value are printed on front. On reverse side of the card the Personal Identification Code (PIN), short user instruction, serial number and service center phone number are printed. PIN is hidden by a scratch bar. The information printed on the card also includes activation deadline and the period of validity. When the validity period is expired, the communication services are not available and the reminder value is not paid back to the subscriber.</p> <p>On acquiring of the GlobalTel card it is necessary to wipe out the protective bar which covers the PIN.</p> <p>Whole and safe protective bar is a guaranty of full integrity of the purchased card.</p> <p>No incoming calls available.</p> <p><b><i>Advantages of use:</i></b></p> <ul style="list-style-type: none"> <li>▪ All payments are made and are equivalent to the nominal card value.</li> <li>▪ User has an opportunity to choose the card nominal value depending on the supposed call durations.</li> <li>▪ The long distance and international communication services are offered automatically without operator mediation.</li> <li>▪ GlobalTel prepaid services system offers to card owner the possibility to know in any time the reminder value of the card.</li> <li>▪ GlobalTel prepaid services system has the voice menu in Russian and English.</li> <li>▪ Services offered through the prepaid cards are protected from unauthorized access.</li> </ul> <p>Call billing based on 30 sec interval. The system informs user on the expiration of card resources by short tone signal, 15 sec before call break.</p> <p>The connection will not be established if the current card balance is less then cost of 30 sec connection in the selected direction.</p> <p>After the call is finished (e.g. one of the parties hangs up the receiver) the charging is also finished and reminder phone units are stored for card future usage.</p>
